EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with an attorney of record, Kimton Eng, on 7/29/04.

2. The application has been amended as follows:

In claim 10, line 24, -- as the control signal -- has been inserted after "stabilized feedback signal".

In claim 18, lines 27-28, " , the feedback circuit further providing the compensation signal to the adjustable fine delay circuit as the control signal;" has been replaced by -- ; and

a stabilization circuit coupled to the feedback circuit and the adjustable fine delay circuit and configured to generate a stabilized compensation signal provided to the adjustable fine delay circuit as the control signal in response to the compensation signal from the feedback circuit, the stabilization circuit including at least one stabilization stage having a flip-flop coupled to an input of a NOR gate and an inverter coupled to the output of the NOR gate. --.

Claims 1-3, 6-12, 15-20, 23-29, 32-38, 41-44 are allowed for the reasons noted in the previous Office action.
